

Projects & Achievements

Fortune 100 RCA Implementation and Training/Coaching | Galaxiez

Led full-cycle implementation of Root Cause Analysis (RCA) strategies within a Fortune 100 company. Integrated complexity theory and dynamic simulation modeling to reduce incident recurrence and improve operational systems across multiple business units. Trained factory teams across the U.S. in applying the Galaxiez RCA method. Facilitated workshops and provided continuous support through documentation, communication, and improvement planning.

System Simulation for Operational Strategy | Galaxiez

Contributed to the development of interactive business simulations using Insight Maker during a limited-term initiative. Gained hands-on experience modeling causal loops and identifying system archetype bottlenecks to support leadership discussions on system-wide improvements.

Production Process Overhaul | Vivid Custom Stickers

Designed and implemented new workflow systems for client production, streamlining the design-to-delivery pipeline, reducing errors, and boosting production speed. Increased production efficiency from 30 hats per hour to 45 hats per hour through optimized workflow strategies and improved methods of production.

Educational Technology & Production Projects | Shepton & WT White High Schools

Managed technical theatre departments, oversaw large-scale production schedules, and directed technical staff in delivering complex, high-stakes performances and events. Led multi-project timelines, equipment maintenance, vendor collaboration, and student supervision. Managed design and build of all areas, including set, costumes, make up, carpentry, sound, lights, and publicity.

Professional Experience

Galaxiez — Data Analyst | Project Manager | RCA Specialist September 2022 – Present

- Directed implementation of customized Root Cause Analysis systems for Fortune 100 clients.
- Utilized Chaos and Complexity theories to lead strategic initiatives aligned with organizational goals.
- Designed system simulations to visualize business dynamics and support decision-making with systems archetypes identification in Casual Loop Diagrams.
- Facilitated Project Flows, a structured cross-team initiative designed to align departments, track project progress, resolve emerging issues, and set weekly follow-up action on troubled jobs and get them back on track.
- Built collaborative environments by convening stakeholders who don't typically interact directly, helping projects evolve through shared insights and facilitate more efficient cross department communication.
- Managed meeting logistics, meeting notes, follow-ups, action item tracking, and issue resolution to ensure momentum and accountability.
- Help implement and train twelve factories on a systems-thinking style RCA over 1 year while providing RCA support, custom documentation per request, and metric tracking on RCA's impacts on safety.
- Integrated DEI considerations and systems thinking into project planning and communication strategies.

Vivid Custom Stickers — Production Manager

September 2022 – June 2023

- Oversaw production workflows and implemented strategic updates to boost quality and throughput.
- Managed production schedules, quality control, customer interactions, and equipment upkeep.
- Led team training and optimized SOPs to meet evolving client needs.

Shepton High School — Technical Director of Theatre

August 2019 – September 2022

- Managed technical operations across all theatre productions and school events.
- Directed student technicians and handled scheduling, logistics, and technical troubleshooting.
- Oversaw asset maintenance and project timelines, and reported project progress to administrators.
- Developed documentation processes and implemented hybrid learning during COVID-19 transitions.

WT White High School — Technical Director of Theatre

February 2019 – August 2019

- Managed technical operations across all theatre productions and school events.
- Directed student technicians and handled scheduling, logistics, and technical troubleshooting.
- Oversaw asset maintenance and project timelines, and reported project progress to administrators.
- Developed documentation processes and implemented hybrid learning during COVID-19 transitions.

Communilux Productions — Assistant Technical Director

June 2018 – September 2018

- Managed project teams of carpenters on tight build schedules.
- Coordinated with designers and clients to translate creative designs into executable plans.
- Created CNC router templates and technical drawings; handled shop operations.

Education & Training

Bachelor of Fine Arts, Theatre Design/Technology

Texas Tech University — May 2018 | GPA: 3.2

Bachelor of Computer Science (In Progress)

University of Colorado Boulder — May 2027 GPA: 4.0

Chaos and Complexity Management & Root Cause Analysis

Trained by Natty Gur, Fall 2021

Certifications & Skills

- OSHA 1910 10-Hour Certification
- Project Management Experience: Stakeholder coordination, iterative planning, documentation, and cross-functional facilitation
- Tools: Insight Maker, Google Workspace.
- Technical Skills: Vectorworks, Autodesk Inventor, Photoshop, Qlab, Final Cut Pro, After Effects
- Strong in stakeholder communication, team leadership, risk mitigation, and workflow optimization

Professional Values

- Equity and Inclusion in workplace and project design
- Collaboration with cross-functional and diverse teams
- Strategic systems thinking and change facilitation
- Process documentation and continuous improvement
- Calm under pressure, adaptable to shifting priorities
